DETAILED ACTION

Rejection under 35 U.S.C. 102

1. Claims 1-19 and 21 are cancelled rendering the rejection to them moot.

Rejection under 35 U.S.C. 112, second paragraph

2. Claim 8 is cancelled rendering the rejection to it moot.

Rejection under 35 U.S.C. 101

3. Claims 1-8 and 21 are cancelled rendering the rejection to them moot.

Specification

4. Applicant's remarks have been fully considered and are persuasive. Consequently, the objection to the specification is withdrawn.

Claim Objections

5. Claim 21 is cancelled rendering the objection to it moot.

Allowance

6. Claims 1-19 and 21 are cancelled.
7. Claims 22-39 are newly added.
8. Claims 22-39 are allowed.
9. The following is an examiner's statement of reasons for allowance:

10. The instant invention is directed toward correction data entry errors that may propagate through out various analytical processes on a computer system that are used to generated analytical results. The instant invention does so through the use of a read history. As analytical processes access data entries to generate analytical results, they store in the read history an identifier and the corresponding analytical result. When there is an update to the data entries, a correction server determines whether the identifier of the corrected data entry matches any of the identifiers in the read log. If so, then the previously generated analytical result corresponding matching data entry identifier of the read history is identified as being potentially inconsistent as a result of the data entry update.

11. The closest prior art are as follows:

12. **Moraes et al. (US Patent Pub 2005/0033777)** discloses a method of tracking, recording, and organizing changes in a computer system. The system traces and detects record changes made to data items by processes. There is linkage between data items to document the impact of changes affected dependent data items. Unlike the instant invention, Moraes does not make use of a read log, that stores the identifier of the data entry that was used and the resulting analytical result that was generated from it, to identify whether there is a potential inconsistency of a previously generated analytical result upon an update to the database.

13. After a search of the prior art, the Examiner has determined that the instant invention is patentable as claimed.

14. Other prior art which are also relevant but not discussed here are included on the attached PTO-892 form and are made of record.

15. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
